

# MedLink Pharmacy

- Using MedLink Pharmacy makes modifications to the standard functionality to allow for a more efficient workflow in a pharmacy setting.
- Additional buttons on the home screen allow users to have more access to the drawers, and if in a secure location, it removes the auto lock feature to allow easier filling of drawers
- Using this workflow allows Pharmacy users to assign and fill the drawers, they can then transport filled and labeled drawers to the ward, where they are then placed in the MedLink Carts for use

## MedLink Pharmacy Setup

- Desktop MedLink
- Pharmacy users Assign and Fill
- Faster Workflow with all drugs delivered locked and labeled to ward

## MedLink Pharmacy Unit

- Lightweight small self-contained uni.
- USB Connection to PC powered by supplied Power Adapter

## MedLink Pharmacy Software

- Ability to open all drawers for both Patients and storage, and unassign all drawers
- See all patients in all departments
- Remove Auto lock if in a secure location
